Profile

I have a growing background in artificial intelligence, data science, and cloud computing, with a strong interest in cloud-based software solutions and SaaS products. I am motivated by turning ideas into practical solutions and continuously learning how to build reliable and impactful systems.

Education

Bachelor of Computer Science 2021 – 2025
Shaqra university - GPA 4.99
Ranked 1st at the University Level – First Class Honors

Professional Skills

Programming Language Python, SQL, Java, C++, C#, JavaScript, PHP, HTML, CSS	Cloud & DevOps AWS, Microsoft Azure, Git, GitHub
Data Science & AI Tools. Pandas, NumPy, Matplotlib, Jupyter Notebook, Google Colab, n8n	UX/UI Tools Figma

Professional Experience

- AI Business Analyst, Hams.ai** 2026/02 – 2026/06
- Worked on AI and automation projects involving prompt engineering, workflow automation, API integrations, and AI agent development using n8n and Postman. Built, tested, and optimized AI agents for clients including (Tamkeen Technologies, SNC, Tawuniya, and Meena Health Clinic), while contributing to BRD documentation and User Acceptance Testing (UAT).
- AI Engineer & Data Science, King Salman Global Academy for Arabic Language-COOP Training** 2025/06 – 2026/02
- Worked on an Arabic NLP project using Retrieval-Augmented Generation (RAG), focusing on preparing, organizing, and processing Arabic text data to improve accuracy and contextual relevance.
 - Contributed to AI and full-stack development, evaluated model outputs, validated data quality, and continued as a volunteer to support research paper preparation.
- AI Engineer Trainee, Samsung Innovation Campus AI Program-Misk** 2025/10 – 2025/12
- Participated in advanced AI training with hands-on projects, working with a team on an **Intelligent Linguistic Advisor** using Retrieval-Augmented Generation (RAG) in collaboration with King Salman Global Academy for Arabic Language.
 - Contributed to data-driven AI development and continued following up on the project's progress beyond the program period.
- AWS Data Engineering Training Program – Ministry of Communications and Information Technology** 2024/12 – 2025/01
- Trained on AWS data engineering fundamentals, including cloud-based data solutions and ETL concepts.
 - Gained exposure to designing and supporting scalable data workflows on AWS.
- AthkaU Program Participant – Microsoft & SDAIA** 2024/11 – 2024/11
- Selected by my university to represent it in the national AthkaU program focused on AI.
 - Gained hands-on experience in AI tools, data analysis, and real-world project collaboration.
- Digital Product Team Intern, E3qlha Company** 2024/06 – 2024/10
- Participated in the development and testing of the Virtual Incubator platform, designed and implemented UI interfaces based on team requirements, and built the company's main website using modern web technologies.

Certificates

AWS Certified Cloud Practitioner AWS Cloud Practitioner certificate.	AthkaU, AI Microsoft in collaboration with SDAIA
AWS Certified Data Engineer - Associate, Training Program	AWS Cloud Security Essential, Front End Development
IBM Artificial Intelligence Fundamentals	ios mobile app development
AI Engineer – Samsung Innovation Campus with Misk	Apple authorised training centre.

Projects

- Musaed Project - AI-Powered Official Letter Generator | King Salman Global Academy for Arabic Language**
AI system that uses Retrieval-Augmented Generation (RAG) to generate accurate and contextually relevant official letters, streamlining the letter creation process.
- Rannan – Intelligent Arabic Linguistic Advisor | Samsung Innovation Campus**
Built an Arabic-first RAG-based AI assistant for Arabic grammar guidance. Contributed to data preparation, semantic retrieval, response generation, and chatbot development while improving response quality and reducing hallucinations.
- AI Projects | Meena Health Clinic & Tamkeen Technologies**
- Built AI agents for **Meena Health Clinic**, including voice-based medication refill and campaign agents for promoting services and booking appointments for patients and dependents using n8n automation and prompt engineering.
 - Developed a voice-based AI agent for **Tamkeen Technologies** showcased at LEAP for enterprise AI demonstrations.

Participation

- Member Board of directors, Google developer group at shaqra university** 2021 – Present
- Hackathon Masar By Sani - First place winner** 2025/02
- Sustainability Innovation Challenge Organized by Saudi Ministry of Environment - Third place winner** 2024/12
